

Is your PC sick?

Small businesses and home workers today suffer from a huge range of problems on their PCs, whether maliciously through the Internet or just a basic lack of tender loving care - and all adversely affect your efficiency.

We provide an on-site service to get your PC back to health with a minimum of inconvenience and cost. We do not charge a call-out fee and, should the problem not be economically repairable, we will not charge you a penny.

NO CALL-OUT CHARGE - NO FIX, NO FEE

Comput@medic offers a wide range of technical services for the PC user in Milton Keynes and the surrounding areas of Bucks, Beds, Northants and Oxfordshire (approximately 35 mile radius). Offering a personal, on-site service we can provide the security of allowing you to see what is done to your computer with the added benefit of a willingness to explain everything to you in layman's terms if required. Whilst the service is primarily software-biased we are able to undertake a wide variety of hardware-related tasks as well. Ranging from the installation of new systems or components to the repair or upgrade of existing parts.

Based on an extensive 34-year experience in the computer industry we have a reputation for reliability and determination. . We are able to come to you at any reasonable time of day or evening and will always use our best efforts to arrive at the time of appointment.

We will charge a fair price for any parts used and charge a flat rate of £30 for the first half-hour on-site and £50 per hour thereafter (and no VAT). We do not have a call out charge, we make no charge for travelling time and will NOT charge you if we fail to fix the problem.

Check out the Comput@medic budget maintenance plan at www.computamedic.co.uk

Protect your PC for as little as £10 per month, no extra call out fee. We find that the vast majority of problems are from software issues - whether it be Adware, Trojans, viruses or just poorly performing applications and are rarely the problems associated with hardware. Most extended warranties offered by manufacturers cover hardware problems but probably will not cover typical software problems you are likely to encounter.
